

MELGES 24 BUILDERS REPORT – 2020

The Melges 24 had a successful year in 2020. We had new boats produced, many used boats have been dressed up and placed back on the water and the Melges 24 interest around the world has been strong.

New Boats: All of the boats are built at Melges USA in Zenda, Wisconsin. 5 new boats were built this season. Constant improvement has been the case with the Melges 24 product. The boats are delivered to the customer with extreme attention to finish and detail. A “just add water” approach. The consumer receives a new boat from Melges and you can simply go sailing – no fuss.

We plan to build another 5 boats in 2021.

Used Boats: Melges assists daily with parts and service on used boats. Customers have anticipated the Winter Series in the USA and other events through the season. Of-course hoping for the World Championship. Used boats have been purchased and are on the water racing. The builder continues to service and assist with parts and preparation so that the sailing is simple and fun for the consumer. Again, this is a daily thing for our team at Melges. Every day we work on advancing the Melges 24 fleet and our customers.

A big thank you goes to our Melges Europe team and the others in the European Community that support and promote the Melges 24. This has been going on since 1993 and it is still very strong thanks to the many people involved. Thank you.

Questions or Issues: None at this time. Production is smooth and in good order.

Any other questions please let us know. The Melges Team is happy to assist in any way possible.

Sincerely,

Andy Burdick
President, Melges Performance Sailboats
