

## **Melges 24 European Championship Portoroz, Slovenia September 4th – 11th, 2021**

### **Technical Committee report**

We had 3 days for the Check-in, Registration and Measurement and Crew Weigh-in, which was enough. Working hours were 9 to 13 and 14 to 19.

6 measures, including Chief Measurer, were present all the time.

- 18 boats full control. The 1-hour (9 boats per day) slot was enough time for full control.
- 40 sets of sails stamped. One sail out of set controlled.
- 2 Equipment substitution were granted.
- 9 Crew substitution were granted
- 1 protest by TC. Protested one boat because the crew sailed from preparatory signal until finish (racing) without personal floatation device worn.

2 boats have mounted corrector weights on the transom inside the boat as the rudders were too light.

On water controls for Mandatory Equipment

- 26 boats were controlled.

No significant irregularities were found.

Chairman of Technical Committee

Branko Parunov

Chief Measurer
